

Saurabh Pandey — Data Analyst / AI Engineer

Saurabh Pandey is a data-focused professional with a strong background in data analytics, machine learning, and business intelligence. He is currently pursuing a Post Graduate Diploma in Big Data Analytics (PG-DBDA 2025) from CDAC, where he is gaining expertise in big data technologies, machine learning, and data-driven decision making.

He has approximately 1.5 years of industry experience as an HVAC Estimation Engineer at Albert Weiss Air Conditioning Products (AWACP). In this role, he worked on commercial HVAC projects worth over \$1 million, handling cost estimation, BOQ/RFQ preparation, and pricing analysis. He also performed exploratory data analysis (EDA) and variance analysis to improve bid accuracy by 10–15%.

Saurabh has strong technical skills in Python, R, SQL, and data visualization tools such as Tableau and Excel. He has experience working with big data technologies including Hadoop, Spark, and data warehousing concepts. He is also familiar with Linux systems and has hands-on experience with ETL pipelines and data processing workflows.

He has developed multiple AI and data science projects, including an Agentic AI system for automated Gmail operations and a recommendation system using collaborative filtering techniques. These projects demonstrate his ability to design intelligent systems that automate workflows and provide personalized insights.

His areas of interest include machine learning, artificial intelligence, data analytics, and building scalable AI systems. He is actively preparing for data analyst and AI roles, with a focus on applying analytical thinking and technical skills to solve real-world business problems.
